(c) Seminar Courses:

STAR2050, 3050, 4050
2. Experiential Learning:

At least 4 consecutive weeks of outside Hong Kong exposure[1]

Explanatory Notes:

1. PHYS and MSEG courses at 2000 and above level will be included in the calculation of Major GPA for honours classification.
2. Students may choose to declare one, or up to two streams, including the Science, Technology And Research Stream.
[a] Upon written approval of the Department, students who have failed a required course in the final year of attendance may be allowed to take a substitute course at the same
level as prescribed by the Department.
[b] Students can be exempted from taking PHYS courses by taking its closely related course, as listed below to fulfill the requirement. Units earned can be counted towards the Major Programme.

| PHYS courses |  | Closely related courses |  |
| :--- | :--- | :--- | :--- |
| PHYS2051 | Quantitative Methods for <br> Basic Physics | MATH2020 / <br> MATH2028 | Advanced Calculus II <br> / Honours Advanced <br> Calculus II |
| PHYS2061 | Basic Computational <br> Physics | MATH3230 | Numerical Analysis |

[c] Students who have taken both PHYS3031 and 4031 can use only one of the courses to fulfill the Elective Courses requirement.
[d] Students who are under the Quantum Science and Technology Stream should take PHYS4031.
[e] Upon approval of the Department, students who declare second major in Earth System Science may be allowed to use ESSC4810 and/or ESSC4820 to fulfill the requirement of PHYS4610 and/or PHYS4620.
[f] Students, who are not under the Enrichment Stream in Theoretical Physics, have not taken PHYS4801 may seek approval from the Department to substitute PHYS4801 with PHYS4802. Students may also take both courses. In this case, PHYS4802 will be used to fulfill the Elective Courses requirement.
[g] The units 6 and 21 (for non-Enrichment Stream in Theoretical Physics) or 12 (for Enrichment Stream in Theoretical Physics) apply to students not taking CHEM1070/1072 to fulfill the Faculty Package requirement of the Physics Programme. Students should note that CHEM1070/1072 is a required course.
[h] Students may seek approval from the Department to substitute PHYS2061 with CSCI2800/1510/1520/1110/1120 and to substitute PHYS3410 with ELEG2202.
[i] PHYS and MSEG courses at 5000 level are offered by the Division of Physics and Division of Materials Science and Engineering respectively for postgraduate programmes.
[j] Students may seek approval from the Department to substitute PHYS4021 with PHYS5410, PHYS4041 with PHYS5420, and PHYS4050 with PHYS5430.
[k] Students may select research-oriented course(s), as approved by the Major Programme, to substitute up to four units for fulfillment of Research Courses requirement.
[1] Students must complete any exchange/research/internship programme(s) offered by the University, Colleges, the Faculty of Science or Major Programme, as approved by the Major Programme, to fulfill the Experiential Learning requirement. Students are responsible for the extra costs incurred in the exchange/research/internship programme(s).

In view of the fact that students admitted through the Broad-based admission scheme have more diverse academic backgrounds under the new senior secondary education system, two course patterns are recommended for students with different HKDSE preparations. Course pattern A is suitable for students who have a better physics and mathematics preparation, e.g. those taken Physics as a single elective subject or done well in Combined Science with a physics component and an elective module in mathematics in HKDSE, whereas course pattern B is for students who prefer to take preparatory courses in physics and/or mathematics in the first semester of studies so as to be better prepared before taking the physics major courses.
